ICVA BULLETIN

Highlights from November 2019

Message from Executive Director

For a Common Agenda

30 years ago, in November 1989, world leaders made a historic commitment to the world's children by adopting the United Nations [Convention on the Rights of the Child](#) (UN CRC).

This Convention is the most widely ratified human rights treaty in history. It has galvanised action and rights have become a reality for millions of children. But hundreds of millions of children live in areas where populations face heightened risk of death, disease, and breakdown of livelihoods. Countries are entangled in fighting, internally and internationally, more now than any other time in the last 30 years. Today, more than 90% of natural hazards are regarded as climate related.

The actions and inactions of governments have a greater impact on children than on any other group in society. Child rights are a legal commitment through the UN CRC, not a moral assertion.

Rights of children are directly threatened by climate change. Children today and future generations are being denied their rights to survival, development, protection, and participation in society.

This week, at the [UN Climate Change Conference COP 25](#), children, youth, ICVA members and other actors are highlighting solutions to understand how placing child rights at the centre of climate action is essential in the fight against the climate crisis.

By interconnecting climate change and key child rights issues at country level, the UN CRC offers a vital framework and mechanism for protecting child rights in a changing climate.

More joined-up action on the implementation of the UN CRC and United Nations Framework Convention on Climate Change is needed to maximise opportunities to protect children through climate policy.

Joining the dots urgently for our common agenda.

Financing

8. IASC Humanitarian Financing Results Group (RG5): The IASC Humanitarian Finance Results Group (HFRG) has now completed a draft workplan to carry forward deliverables through 2020. Priority areas for 2020 include:

- Improve the case for increased use of multi-year and flexible funding in humanitarian operations;
- Facilitate the ongoing process of simplification and harmonisation of UN systems to reduce burdens and free additional resources for humanitarian operations.

The final draft workplan will be available to share once it is approved by the IASC OPAG. For those NGOs that are members of the Results Group, it will be important to look through the final priority deliverables for 2020 and identify where leadership or support can be provided to implement. At the November meeting of the IASC OPAG, the HFRG Co-chairs (ICVA and OCHA) also appealed to UN agencies to improve support for HFRG deliverables. The 2019 Asia-Pacific Regional NGO Partnerships week: 26-29 November in Bangkok.

The 2019 Asia-Pacific Regional NGO Partnerships Week took place in Windsor Hotel Bangkok. It was a week-long programme which provides a unique forum for networks and partnerships to meet and address key issues related to humanitarian policy, implementation and beyond. It is a partnership together with Asia Disaster Reduction and Response Network (ADRRN) and Community World Service Asia (CWSA) with support from UNOCHA, UNHCR, IFRC and many others.

This year the crosscutting theme was “accountability, coherence and protection”. During the week, participants from the UN, NGOs, private sector, academia and beyond gathered together to share experiences, discuss and solve common challenges in a range of humanitarian topics such as climate change, disaster risk reduction, localization, protection and accountability to affected communities, shrinking civil society space, and beyond. A number of networks and partnerships also hold their annual meetings and consultation/dialogue sessions to share their expertise and collaborate on best practices to address shared problems.

Regional IASC meeting for Southern Africa

ICVA participated in the Regional IASC meeting for Southern Africa together with representatives of UN agencies and ICVA members. The meeting was an opportunity to exchange information, coordinate and prepare actors for the incoming period in the region. Specifically, aspects of food insecurity and acute malnutrition, exacerbated by drought and early effects of the climate change, coupled with political instability in multiple countries in the region, have been underlined and discussed. Some of the above indicators are worrisome in several sectors. ICVA is working with members to ensure the appropriate positioning of this slow onset crisis as done in the IASC EWEARE Analysis.

This is a call to all parties, starting from governments to address the root causes while identifying and implementing durable solutions for the already displaced. More information and documentation will be available in due course. Addis.tesfa@icvanetwork.org
