PLEDGES / COMMITMENTS / ANNOUNCEMENTS

A new initiative to improve the understanding of climate and disaster risk in humanitarian and fragile contexts was announced on 10 November at COP27 in Egypt at a side event organized by the UN Office for Disaster Risk Reduction (UNDRR). UNDRR is supporting Governments and the United Nations bringing together humanitarian and development partners to jointly analyse and address risk factors that would impact on relief and development operations. This work was first rolled out in South Sudan and has since been expanded to Sudan, Niger, Somalia and Eswatini. Underpinning this work was UNDRR’s Guide to Strengthening Climate and Disaster Risk Analysis in the Humanitarian Programme Cycle and the Risk Information Exchange (RiX) which aggregates over 600 global and national risk datasets from the UN and other sources spanning hazard, vulnerability, exposure, and climate change. Key information is geo-tagged and mapped in a visualisation tool.

The Early Warnings for All Action Plan calls for initial targeted investments of US$3.1 billion between 2023 and 2027 – around 50c for each person to be covered. According to the Global Commission on Adaptation, an investment of US$800 million on early warning systems in developing countries could avoid losses of $US3–16 billion per year. The Action Plan lays out four main areas for investment:

- Observations and forecasting – US$1.18 billion to monitor hazard and early warning services,
- Preparedness and response – $1 billion to build national and community response capabilities,
- Disaster risk knowledge – US$374 million to collect data and undertake risk assessments on hazards and vulnerabilities,
- Dissemination and communication – US$ 550 million to communicate risk information in an accessible way, so it reaches all those who need it.

The plan identifies key areas for advancing universal disaster risk knowledge, outlining priority actions required to achieve this, building on the Sendai Framework for Disaster Risk Reduction.

Egypt’s COP27 Presidency and the United Nations Economic Commission for Africa launched today “Reducing the Cost of Green and Sustainable Borrowing” initiative in climate-vulnerable countries at COP27. The initiative is aimed at addressing the larger issues of deteriorating fiscal health under threat by potential output losses linked to climate hazards.
and disaster recovery costs, as well as transition risks that may hit the economy at large. This initiative will help build deeper, resilient, and sustainable financing to accelerate its post-Covid green recovery through various mechanisms. The focus will be on Green and Social and Sustainable (GSS) Bonds to fill the SDG financial gaps.

Launch of the Sustainable Debt Coalition Initiative aims to tackle the fiscal challenges of developing countries linking debt-climate-development.

**Funding pledges at COP27 for loss and damage:**
- New Zealand announced an initial pledge of $20 million
- Belgium announced € 2.5 million, specifically to Mozambique, which suffered terrible losses last year due to extreme rains
- Austria announced $50 million for loss and damage
- Scotland, which had previously pledged £2 million, announced an additional £5 million
- United Kingdom will triple its adaptation finance by 2025, going even beyond the promised last year in Glasgow. The £13 million Adaptation and Loss and Damage package includes £5 million for the Santiago Network and £4 million for Climate Risk Management including the Risk-Informed Early Action Partnership (REAP).

World Bank President David Malpass announced at COP27 the launch of the Global Shield Financing Facility (GS-FF), with countries pledging funding to support its launch, among which Germany pledged EUR 170 million to the facility and climate risk financing in general. The Global Shield Against Climate Risks will be launched on Monday 14 November in a High-Level Event at COP27 by G7 and V20 representatives and partners.

In response to the announcements at COP27 on the Global Shield against climate risks, CARE International comments:
The Global Shield put forward by some developed countries in cooperation with the V20 group of vulnerable developing countries can become a useful complement for these countries to better deal with climate impacts in addition to a much-needed Loss and Damage Finance Facility under the UNFCCC.

Sven Harmeling - CARE Climate Justice Global Policy Lead says: 
“A few rich countries have made pledges here at COP27 to support the shield, these include Germany (170 million Euro), Austria (20 million Euro) and Ireland (10 million Euro). The finance must be new and additional and should not be counted towards adaptation finance, as the latter is anyway underfunded. The contributions, if labeled climate finance, should primarily go into the V20 multi-donor trust fund component of the global shield as it may be best designed to channel grant finance to affected communities.

Insurance type approaches often face challenges in addressing the needs of the most vulnerable, for example because of unaffordable premiums or small payouts well below the damage experienced. They often also do not and may come with unfavorable financial terms that insufficiently reflect the need for main emitters to take their responsibility, so insurance approaches need to be carefully designed to match pro-poor principles and gender considerations.”
EVENTS

In person:
Sharm el Sheikh Climate Change Conference 2022 meetings schedule

Events, participation and coordination with the Inter-Agency Standing Committee (IASC) during COP27

- **List of events** – feel free to include any events you are hosting, attending as speakers etc. on this link. Quite a few events have already been included, please make sure that there are no duplicates when including your events.
- **Level of IASC member participation** – while ICVA Secretariat will not be participating at COP27, if any members would be interested to share collective messaging coming at COP27, please do connect with me.
- **WhatsApp Group (for coordination during COP27)** - For humanitarian organisations who are attending in-person only, please do sign-up to the Whastapp group for coordination on-site.

For those who wish to **follow the UNFCCC process (COP27) remotely**, you can do so via:

- Webcast and press materials are available [here](#).
- Recordings of side events are published [here](#).
- [UN Climate Change on YouTube](#).

**Booths at COP27**

**Event Platforms**
Find below online and in-person events that can be viewed through the various platforms and sites:

- **COP27: Official Schedule of Events: Virtual** – Watch live and recorded
- All the [Pavilions at COP27](#) – some virtual and some are only in-person
- The [Zurich Flood Resilience Alliance at COP27](#) – events livestreamed
- [UNDRR at COP27](#) – events and messages
- The [anticipatory action events at COP27 (a joint mapping by REAP and the Anticipation Hub)](#) - some virtual and some are only in-person

**Anticipatory Action Events at COP27**
Anticipatory action will be a recurring theme among many of the discussions at COP27. On this page you can find a list of relevant events for practitioners, scientists and policymakers in this field. Please share any anticipatory action events happening at COP27 using this form and we will add them to this page. The event overview will be continuously updated as we receive new information.

Join a global movement of people sharing solutions and taking action to build climate resilience everywhere. [Register](#) for the Resilience Hub Virtual Platform and explore what it has to offer!
By registering for the virtual platform, you will have access to:

- Live-streamed sessions
- Networking opportunities
- Key information about the Resilience Hub
- Highlights from COP27
- A virtual photobooth
- Sponsor booths
- ... and much more!

**OECD COP27 Virtual Pavilion**

The pavilion will hold parallel sessions and events before and during the COP27 Conference on a range of topics including financing the net-zero transition, mitigating GHG in the agriculture and food sector, adapting to climate change, carbon prices, innovation, sustainable mobility and more. Please register in advance to the OECD virtual pavilion to ensure your participation to multiple events that will be held during the COP.

**KEY MESSAGES / CALLS TO ACTION / CAMPAIGNS / INITIATIVES**

COP27 Presidency launches Sharm El-Sheikh Adaptation Agenda (available on both the COP Presidency page and Climate Champions page) – the agenda is to rally global action around 30 adaptation outcomes that are needed to address the adaptation gap and achieve a resilient world by 2030. Collectively, these outcomes represent the first comprehensive global plan to rally both State and non-State actors behind a shared set of adaptation actions that are required by the end of this decade across five impact systems: food and agriculture, water and nature, coastal and oceans, human settlements, and infrastructure, and including enabling solutions for planning and finance. The Agenda emphasises the urgency for counting with evidence-based, actionable adaptation plans for all actors, making climate risks visible and accessible, and to deploy the locally-led adaptation principles.

**ACBAR Calls for Environment Funding for Afghanistan to Mitigate Climate Change and Build Resilience in Local Communities** - Agency Coordinating Body for Afghan Relief and Development (ACBAR)

**UN Secretary General’s COP27 Key Messages**

Key messages from the Climate Action Team on what COP27 must achieve, migration, adaptation and resilience, loss and damage and finance.

**CARE COP27 Position (En, Fr, Sp, Ar)**

This position paper outlines CARE’s key asks for COP27, which includes addressing loss and damage; meeting the US $100 billion climate finance goal; and ensuring climate mitigation and adaptation measures are gender-just.

**Plan International Loss and Damage Brief** “From the Frontlines: youth call for action to address loss and damage caused by climate change”
This brief examines the meaning and impact of loss and damage through an intersectional, youth-centred, gender-equality lens. It presents an urgent call to action with four key recommendations leading up to the COP27.

**Convening Climate Resilience Salons – Harnessing the power of women, displaced and migrant women to attain COP27 goals** (New Women Connectors partnering with Trellyz)

**Global Climate Action at COP27**

The **High-Level Champions and Marrakech Partnership programme** for COP 27 is developed in collaboration with the programme of the COP 27 Presidency. This **programme** of the **Marrakech Partnership** showcases momentum from the whole of society, and focuses on key issues to drive ambition and action. The **Action** events highlight contributions to COP 27 outcomes through progress on near-term action and implementation; the **Implementation Labs** (iLab) present solutions, roadblocks to overcome, and collaboration needs to attain the relevant 2030 Breakthrough goal: the **Future Labs** to show bold ideas in systems change towards a regenerative, just world. The concept notes, programmes and outcome documents of the events will be posted on this page as they become available.

**IASC Key Messages**

- **IASC Key Messages on the Climate Crisis**: The humanitarian community is calling for urgent and ambitious mitigation action to avert the worst outcomes of climate change, increased investments in building resilience and adaptation for the most vulnerable and worst affected, and meaningful decisions, concrete actions and increased finance to avert, minimize and address losses and damages.

- **IASC Key Messages on the Global Impact of High Food, Fuel, and Fertilizer Prices**: The IASC is alarmed at the effects of a super-crisis driven by lack of accessible and available food and energy and coupled with economic shocks. As humanitarian agencies, our mission is to protect the lives and livelihoods of the poorest and most vulnerable people, including refugees and the internally displaced. These messages are about what the crisis means for these people, and our efforts to help and advocate for them.

Please feel free to circulate these messages within your networks using this [link](#). Should you have any questions, please contact the IASC secretariat ([iasccorrespondence@un.org](mailto:iasccorrespondence@un.org)).

**Climate and Environment Charter Signatories Statement before COP27**

Word versions in English and Arabic are available for download, and French and Spanish translations will be uploaded in the coming days. We encourage you to use this statement in your own communication around COP27.

**IFRC’s Key Messages, Policy Brief and Press statement for COP27: “The world cannot afford another set of vague promises, warns IFRC”**

**Act Now: Migrant Inclusion in Climate Action is an Obligation, Not an Option**

The COP27 statement by the United Nations Network on Migration on migrant inclusion in climate action.
ICRC’s Call to COP27 to Strengthen Climate Action in Conflict Settings

Countries enduring armed conflict and other violence – the vast majority of which are among the world’s least developed countries (LDCs) – are some of the most vulnerable to the climate crisis. Ahead of COP27, the International Committee of the Red Cross (ICRC) urges parties to the United Nations Framework Convention on Climate Change (UNFCCC) and the governing bodies of the Conference of Parties (COP) to make three commitments to ensure that people living in conflict settings are not left behind.

Joint statement for the COP27 from UN special procedures: COP27: Urgent need to respect human rights in all climate change action, say UN experts

The messages include those of the Special Rapporteur on climate change and on migration.

COP27 Must Act on Human Mobility

The Advisory Group on Climate Change and Human Mobility has put together messages on how COP27 must act on Human Mobility.

Platform on Disaster Displacement Key Messages Increasing International Cooperation, Action and Support Better Avert, Minimize and Address Displacement Related to the Adverse Effects of Climate Change

PDD Steering Group’s Working Group on Climate Change developed a set of key messages that Member States and other stakeholders are encouraged to use in their official statements as well as interventions in relevant plenary sessions, side events and negotiations. Please disseminate them widely!

African Climate Caravans

The Caravans are a call for climate justice, justice for those least responsible, most affected by climate change who are also the source of climate solutions and resilience leaders. There will include a series of meetings, an interactive map with what is happening at grassroot levels as change makers. Find out more information HERE.

Disaster Displacement and Human Mobility at COP27

Learn more about how displacement and human mobility relating to disasters and the adverse impacts of climate change are being addressed at COP27. Platform on Disaster Displacement (PDD) will include an Information Note and Key Messages on Disaster Displacement for COP27. You can already find a non-exhaustive list of events discussing disaster displacement and human mobility scheduled to take place during COP27. Other resources will also be updated for further reading that States and other stakeholders can use to inform their interventions at the different events and sessions at the conference. Find the page HERE.

REPORTS / ANALYSES / POLICY PAPERS

Finance for Climate Action: scaling up investment for climate and development

This report of the Independent High-Level Expert Group on Climate Finance is intended to provide a framework for finance for climate action, covering the overall needs for the comprehensive approach embodied in the Paris Agreement and UNFCCC. All the elements
are necessary and urgent and most of the actions must start now; it is the science and the
world’s perilous condition that set the urgency and timing.

**Climate Loss and Damage in Africa: Massive Costs on the Horizon: CARE (10 November)**
There are still a lot of uncertainties about the scale of the loss and damage costs in Africa.
However, there is no doubt that the scale will be massive and that this will significantly
hamper the countries’ possibilities not only to pursue sustainable development goals, but
also to invest into the necessary adaptation and resilience as well as mitigation
measures. We will remain vigilant regarding the type of solutions put forward by developed
countries: humanitarian aid, early warning systems and insurance mechanisms are not a
silver bullet to respond to all losses and damages. CARE joins the call for the establishment
of an ambitious loss and damage finance facility as also CARE’s COP27 position demands.

**Report of the Executive Committee of the Warsaw International Mechanism for Loss and
Damage associated with Climate Change Impacts**
Agenda item(s): SBI 57 agenda item 15, Report of the Executive Committee of the Warsaw
International Mechanism for Loss and Damage associated with Climate Change Impacts;
SBSTA 57 agenda item 5, Report of the Executive Committee of the Warsaw International
Mechanism for Loss and Damage associated with Climate Change Impacts

**The Loss and Damage Collaboration: The Cost of Delay: Why finance to address loss and
damage must be agreed at COP27**

**Adaptation Gap report 2022: Too Little, Too Slow – Climate adaptation failure puts world
at risk (UNEP)**
The report finds that global efforts in adaptation planning, financing and implementation
are not keeping pace with the growing risks. Inger Andersen, Executive Director of UNEP,
said: “Climate change is landing blow after blow upon humanity, as we saw throughout
2022: most viscerally in the floods that put much of Pakistan under water. The world must
urgently reduce greenhouse gas emissions to limit the impacts of climate change. But we
must also urgently increase efforts to adapt to the impacts that are already here and those
to come."

According to UNEP’s Emissions Gap Report – the recently released sister publication of the
Adaptation Gap Report – Nationally Determined Contributions (NDCs) under the Paris
Agreement point towards global warming of 2.4-2.6°C by the end of the century. Research
from the Intergovernmental Panel on Climate Change (IPCC) says that climate risks will
intensify with each tenth of a degree. Insights from the Emissions Gap Report 2022 – 11
November 09:30 – 10:30 GMT+2 (In-person at the EU Pavilion and Online)

**Four reports that set the scene for climate financing at COP27**
- The Fifth Biennial Assessment and Overview of Climate Finance Flows
- The Report on progress towards achieving the goal of mobilizing jointly USD 100
  billion per year to address the needs of developing countries in the context of
  meaningful mitigation actions and transparency of implementation can be
  found here.
- Work on definitions of climate finance can be found here.
• Work relating to Article 2, paragraph 1(c) of the Paris Agreement (making finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development) can be found [here](#) and [here](#).

**Addressing Loss and Damage: Practical Action – a summary report of the Scottish Government’s conference on Loss and Damage**

**ODI COP27 Hub**
Explore analysis and rolling commentary on the big issues at stake at this year’s conference in Egypt. Covering climate finance, just energy transitions, adaptation, loss and damage, and more. The hub will be updated across the next fortnight with new blogs, podcasts, reports and events. See links:

- Climate finance
- Just energy transitions
- Urban transitions
- Adaptation, loss and damage
- Small Island Developing States

**Operationalizing finance for loss and damage: from principles to modalities** - Stockholm Environment Institute (SEI)
This report feeds into crucial negotiations and discussions on loss and damage finance by exploring different options for how it can be operationalized. It draws on literature on the effectiveness of climate finance and development and humanitarian assistance to set out key principles for loss and damage finance that are grounded in climate justice. The authors find that the following principles should underpin how loss and damage finance is operationalized:

- historical responsibility and the “polluter pays” principle
- equitable and targeted support (including ensuring gender equality and protecting human rights)
- grant-based and programmatic finance
- accessibility
- recipient ownership
- transparency and accountability

**Embracing Discomfort: A call to enable finance for climate-change adaptation in conflict settings** October 2022
This paper is jointly issued by the International Committee for the Red Cross (ICRC), ODI, the International Council of Voluntary Agencies (ICVA), MercyCorps, Red Cross Red Crescent Climate Centre, World Food Programme (WFP) and United Nations High Commissioner for Refugees (UNHCR).

The paper focuses on the **political will needed for the international community to step out of its comfort zone when it comes to channelling climate finance for climate-change adaptation**. Current mechanisms are characterised by low risk appetites, cumbersome technical and procedural requirements, inflexibility of scales, siloed structures that inhibit collaboration across conflict and climate expertise, and the inability to optimise the expertise and access of organisations across different sectors.
Together, we hope that the recommendations put forward with examples of good practice will spark conversations with policy makers on addressing the gaps in climate finance reaching some of the most vulnerable of global populations.

**Climate finance: Accounting and accountability** (Development Initiatives) 1 November 2022

Without a standardised approach to accounting and accountability, those most in need of climate finance will continue to be short-changed. Currently, the data underpinning our understanding is limited at best and at worst, misleading. This undermines its transparency and accountability which are critical to delivering impact. It has also eroded trust between those who have committed to providing climate finance, and those who should be receiving it.

That is why it is essential that at COP27, the tracking of these flows is higher up the agenda. Wealthy countries should not have the discretion to measure their commitments in the most politically convenient way. They shouldn’t be able to obscure the link between climate finance and other types of funding, so that it is impossible to tell what is new and what has just been relabelled.

A strong reporting framework that supports mutual accountability would be universally beneficial, helping ensure that bigger commitments translate into more spending, and allowing donors to coordinate their action. To drive effective and fair climate action, ambitious spending targets and pledges must be underpinned by a robust and transparent tracking and reporting mechanism.

In advance of COP27, this briefing provides an overview of some of the biggest problems with existing climate finance data to highlight what needs to change in order to reach the next target. It focuses on the following five issues:

1. The lack of uniformity among reporting methods
2. The absence of detail in the reporting of different climate finance modalities
3. The inaccuracy of spending estimates
4. The lack of specificity in regard to transaction details
5. The absence of transparency on finance additionality.

**Filling the gap: Addressing climate-driven crises in Pakistan**

Existing funding systems are not working for the new realities of climate change and its impacts on people, particularly those most marginalised and least responsible. There is an urgent need for a better targeted, more reliable, and more comprehensive global response. Humanitarian and development funding is not currently sufficient, is not rooted in climate justice and does not address the full spectrum of loss and damage. Without confronting and addressing the gaps in existing systems, catastrophic climate events will devastate individual lives, families, and communities.

**Focus on Africa: Our expectations on the 27th UN Climate Change Conference** - Welthungerhilfe

The upcoming climate conference in Sharm El Sheikh, Egypt, is taking place under difficult geopolitical auspices. It remains to be seen whether the major powers will continue to
cooperate on climate protection or whether issues of energy security will overshadow climate protection. Yet the climate crisis, along with armed conflict, is the biggest driver of hunger and food insecurity, exacerbating existing problems and having a particularly devastating impact in many African countries. The droughts in the Horn of Africa and sub-Saharan Africa are currently demonstrating this particularly dramatically. Progress must be made at the climate conference in all areas to be negotiated: national commitments to reduce greenhouse gases are insufficient and being implemented too slowly, adaptation measures need improved financing, and a settlement for dealing with loss and damage urgently needs to be found.
